

Three Impossible Visions

Dénes Joó,

Architect-Urbanist, Systemic Evolutions & Pyramids Researcher.

Abstract:

Instead of the actual obsolete statical organizing conceptions is proposed the application of some more adequate dynamic principles on any organizing level, e.g. in the following cases:

- 1 – **Reorganizing of Europe** based on cosmic principles;
- 2 – **Terrestrial reorganizing** after the previsible Moon-change;
- 3 – **Reconsideration** of the whole **Cosmic organizing**.

So far, this seemed to be impossible, but the Nature/Higher Spiritual Beings finally apply the most adequate solutions. Let's see these very actual questions and their prospects.

1 – REORGANIZING OF EUROPE based on cosmic principles:

Contrary to the actual European Union „in bulk”, or/and to the idiot idea of the United States of Europe, instead to liquidating the historical national states, it is proposed a gradual structuring based on **cosmic principles**, with self-organizing on every social-economic-environmental level. According to the ancient Hermetic principle „How up so down” [1], the „core” of Europe is formed by the area of the **Carpathian Chain** – the terrestrial projection of the constellation **Draco/Dragon** – of which Ecliptic Centre/”cosmic navel” is the **Rosia Poieni Peak**, in the Western Carpathians. After the name of the constellation **DRACO**, let's call this **Central-East European Territory** DRAKYA, separated by the river Danube in North-Drakya = DAKYA and South-Drakya = TRAKYA (1.1), [2]. With the **Central-West European Territory** (former German-Roman Empire) together, is forming the **New Central Europe**, and surrounded by the **West-, North- and East-European Territories** – each of them with Northern- and Southern parts, necessary for the functioning, similarly to the twin organs inside the organism – it is getting under way the **NEW EUROPE**, these five **Territories** representing **States Unions** composed by **national states/countries**, each of them by **counties**, and en- or ex-**claves**, this system functioning according to a damped harmonic oscillator model (1.2).

The outlining of these **Territories/States Unions** (not United States!) **has already begun**. So, within the **Central-East European Territory/States Union**, DAKYA is relatively simple to realize, extending the V4 Association of Bohemia, Slovakia, Poland and Hungary with Romania and Moldova, respectively of course with inclusion of the intercalated small territories in form of enclaves and exclaves in the first period, but TRAKYA is more difficult to border inside the Mediterranean Sea. The coordinating centre of DAKYA results of course by **cosmic criteria**, through realizing the new spatial town ROSIA POIENI, with residential and agreement zones on the surface, and with production and communal services in the depth, including a transatomic work too [2]. A similar coordinating centre is possible to realize in TRAKYA at the **Olympos Mountain**, which is the projection of the **Thuban**, first/load star of the constellation **Draco/Dragon** (1.1). The **Central-West European Territory/States Union**, in practice after two centuries pause caused really by the stop in 1806 realized nominally by Napoleon, can continue his multiseular functioning inside the former German-Roman Empire, with coordinating centres/topical capitals of the North, respectively Southern parts separated by the Alps, **Berlin** and **Rome**. The **West-European Territory/States Union** coincides with the former French-Iberic Kingdoms, divided into North and Southern parts by the Appenines, with the topical capitals **Paris** and **Madrid**. The **North-European Territory/ States**

Union coincides with the Skandinave-British Kingdoms, after the Brexit being in course a new association between the insular and peninsular countries, with topical capitals **London** and **Stockholm**. Finally, the **East-European Territory/States Union** is composed by the former Soviet Republics situated between the Baltic Sea in the North and Black Sea in the South, bordered in the East by Russia, the topical capitals being **Kyev** and **Minsk (1.2)**.

The functioning as a whole of this New European Organism is conceived in a **dynamic** form, accordingly to the proposed **damped harmonic oscillator model (1.2)**, ensuring in this way a harmonic and balanced evolution on long term, with participation of all territorial-social unities in the proposed **self-governing system**, similarly to the ancient Gobe-Szekler self-organizing, but instead of 2x3 with 2x5 continental areas, with areal self-government based on elections in every fifth year, and with government role after every 30 years. In this context the Central-East European countries – after a lateral position in European context – will have a central position with possibility to catch up the developed states of Europe, moreover to surpass them in the economical and demographical evolution, having more favourable position regarding the natural and human resources. Based on these premises, extending the notion of „environment” from the terrestrial to the cosmic level, it’s possible a larger vision in understanding and solving problems, both on short and long term, with more efficiency. Knowing the cosmic connections, it’s possible to predict future terrestrial events, and inverse, some terrestrial phenomena can call our attention to ensur cosmic events, or can explain former events. Our ancetors lived together „with the stars”, and with the Sun-God, they can „read all from the sky”. The spiritual evolution to the possible 8D of the terrestrial humanity means to come back to this spiritual/Divine thinking.

2 – TERRESTRIAL REORGANIZING after the previsible Moon-change:

On the night of 5-6th August 2010, I had the following strange vision [3]: Over the Pacific Ocean, from western direction approaches the planet-ball **Sedna**, and hits against **Sedona**. When the ball approaches, at the same time two great supervolcanos erupt in northern and southern directions. The two great rivers of lava flow together and form an enormous very light-grey earthworm shape, split into two by the ball, and the two ends withdraw, each of them in their own hole, the ball continuing its way in eastern-southeastern direction to Florida and over the Atlantic Ocean to South-Africa, with eastern-northeastern direction-changing over the Indian Ocean and Sunda-Land as far as that the Pacific Ocean, then the above awaiting **Moon** will attract it to itself, pushing it out and occupying its place. This brought me great relief because I was aware that the core of the former planet **Luna**, attracting to itself the present asteroidas, ends up in becoming one again, as an atonement for the early previous breaking of the planet. Curiously the planet-ball goes on spinning around an axis perpendicular to the advancement direction, and jumping elastic, without being shattered.

Analysing this surprising vision [3] and (2.1, 2.2, 2.3), the calculated date of the visioned event – in conformity with the Mayan astronomical calculations – will be **02.02.2022**, namely 4,200 days after **06.08.2010**, representing the sunspot cycle as cosmic transition between the Sun and the Earth. The date of 6th August has a special meaning: every year, before the sunrise is formed a curious shadow-pyramid at the Ceahlau mountain-peaks within the East-Carpathians in Romania, when our Son becomes the annual light-ration from the Central Sun/core of our Galaxy Milky-Way, and this day in 1945 marked the start of the atomic era. The 1,000 km diameter planetoid **Sedna** was baptized by its discoverer Michael Brown in 2003 after the Ocean-Goddess of the Inuits, officially at 87 AU (Astronomic Unit=150 M km, the distance Sun-Earth) distance from the Earth (13 B km), within the inner Oort-cloud, with its previsible next coming in 2076, and later in every 10-12 thousand years. **Consequently, no chance for its terrestrial impact! The vision is defective!** However, my

absolutely spontaneous visions each times were very exact! Interestingly, the first official information of NASA (established in 1958 for the study of the supposed companion of our Sun, called Hemera or Nemesis) differ radically from the actual ones.

Of course, a similar impact could destroy our actual civilization. However, with or without any same catastrophe, it's necessary the urgent reorganizing of the terrestrial society, based on self-organizing principles instead of self-destructing ones. For a long time forgotten **ancient Gobe Model** (started from the former civilization centre Gobe, on the place of the actual Gobi Desert) was applied inside the **Carpathian Basin**, within the Szekler society [19], (2.4). This society was organized in **3 genera/clans** (trium generi Siculi), each of them with 2 tribes/ staffs ($3 \times 2 = 6$ **tribes**), every one containing 4 branches/boughs ($6 \times 4 = 24$ **branches**), each of them with 10 homes/households and many families. The **yearly changed military and civilian leading** was held according to the following simple, but **very strict regulations**:

- a) The same tribe never holds at the same time both – military and civilian – functions. Two branches of a tribe, as parts of a bigger unity, are never in function in the same time.
- b) Both functions are held every time by two different tribes. The six tribes divide into two trinary groups, of which members are never in function at the same time.
- c) The system of every two tribes is identical, they hold the two functions in the immediately following two years.
- d) This order is a consequence of the tribal structure, namely the six tribes form the three genera, each of them with two tribes.

From these regulations result the **three basic functioning laws**:

- 1) – Total equilibrium of the three genera.
- 2) – Identical regulation of two genera.
- 3) – Inversion/reflection of the two cycle-halves.

The sinusoidal lineation resulted by these regulations – with proportions 1:5, 2:4 and 3:3 for the three genera/tribe-pairs – is carved on the wooden front-doors/gates of every household. From the graphical representation result the 3 symbols of the Szekler flag too – **Sun, Moon** and „**Star**” – on sky-blue/azure base (the colour of the **Ether**), the „**Star**” being the Hemera, the 3rd member of the Hessiodian second generation Titans Trinity **Helios-Hemera-Selena**, evolving solenoid-like along the Photon-Belt with describe circles of 25,920 and 31,746 years respectively octaves of $7 \times 25,920 = 181,440$ and $7 \times 31,746 = 222,222$ years, of which multiples marked the Elohim-Nephilim-Annunaki cosmic periods, starting 666-444-222 thousand years ago, the last Hemera-cycles of 31,746 years being marked by the 8 „White Castles”/stone pyramids (the four corners – Alba Iulia, Zahony, Székesfehérvár, Belgrad – of the Carpathian Light-Pyramid, Rome, Jerusalem, Biograd, Bilhorod), and marking the connection of the binar system **Sirius-Sun** through the giant planet **Nibiru**, with its elliptic trajectory of 3,600 years.

Based on the terrestrial similitude – 3 continent-pairs on the northern respectively southern hemispheres – and the partitioning possibilities of the continents in „branches”, is possible the application of the ancient Gobe Model in the terrestrial reorganizing and functioning (2.4), resulting a harmonic social-economic-environmental terrestrial evolution on long term, with participation of the all three – draconic-reptilian-mammal [15] – cosmic races origin terrestrial humans, of which declared home the Earth it is. Only thus is possible the saving of the Earth.

3 – RECONSIDERATION of the whole COSMIC ORGANIZING:

The secular cosmic model starting with Einstein [22], at the first is a „stillborn child”, because its mathematical foundation was attached only after a lean century (1915-2005 [25]). So, without comprehension, were invented 1,001 „nocturn fairy tales” and conjectures, so called „cosmic models” – making impossible the really scientific discoveries and studies, e.g. [20,21,24,], and many-many others – based on the impossible/absurd Big Bang and Eternal Inflation hypotheses [17]. The discovery in 1982 of the IOVITZU’S ETHERON, the particle of the ETHER f24] – shadowed by the „discovery” of the Eternal Inflation in the same time – made possible the extension of the official recognized „**Periodic Table**” with 118 chemical elements to 558 nucleonic structured elements, and through the unification with the two pre-elements Gluon and Quark (more exactly the splittable Protons and Neutrons), and before them the ETHERON as **start-element** – in the case of this Atomic Level ELECTRON, generalizing the notion of ETHERON from the Etheric to the other Cosmic Octavic Levels – results the **Whole Periodic System** [4] with 560 elements and the start/transitional **Etheron**.

The **duality** – as basic cosmic attribute – is present on every cosmic level, so in form of twin particles, or structures resulted by the spherical-toroidal duality **sphere-in-torus** and **torus-in sphere**. Interpreting correctly the word „a-tom”=unsplittable, this can refer only to the etheronic start-elements [6,11], the other **splittable elements are dual structured**, namely together with the well-known **nucleonic structured elements** formed by **spherical core** (of pre-elements) and **toroidal coating/envelope** (electronic/etheronic cloud), there exist **bionic structured elements** too, formed by **toroidal core** (Quintonic Bions) and **spherical coating** (electronic/etheronic Le Sage/Fulleren-like cages, similarly to the well-known supramolecular structures discovered by Jean-Marie Lehn et al., 1969) [5,6,9] (3.1). While the **nucleonic structured elements** are arranged basically in spiral-discoidal form around 8 axes/16 semi-axes, the **bionic structured elements** form a 9th axis, perpendicular to the plane of the disc, like a gyroscopic structure, called **Extended Whole Periodic System** [8,9,10] (3.5). The successive transformation in each other of the elements within this mill-like system takes place every time through the suitable bionic element situated on the Bionic/World Axis [12], which itself is a vorticial spiral, with intercalation of toroidal evolutionary phases [11,12] (3.8).

On macro-cosmic level these **fractal structures** correspond to the **notes of a diatonic musical system** composed by **pentatonic** and **octavic** scales (3.3,3.4), the suitable cosmic evolutionary phases – after the main initiators/contributors in the cosmic temporal order within a cycle – called **Ginzburg/Bionic Structured Phase** [12,26] with **5 Big Pentatonic Levels (Icosa, Dodeka, Octa, Hexa, Tetra)**, respectively **Einstein/Nucleonic Structured Phase** with **7 Big Octavic Levels (Tachionic, Noethic/Conscious, Etheric/Sensitive, Atomic-Subatomic, Astral/Galactic, Universal, Multiversal)** [12,16] (3.7). In this structural system, these cosmic notes transform successively in each other – similarly to the elements – within the above **cosmic evolutionary phases** of a **Big Cosmic Cycle** between two **Big Explosions**, joint by a **Big Implosion** at the **inflexion-point** of the covering **logistical-hyperbolastical evolutionary curve of the Big Cycle**, composed by fractal-like smaller same cycles/curves of the cosmic levels/notes [12], taking place an exponential-logistical bifurcation, respectively a running up and a jumping (3.6), representing the **chaotic phases** of every level – **rising chaotic phases** within the **bionic structured levels**, respectively **falling chaotic phases** within the **nucleonic structured levels**, the **maximum chaotic phase** of the **whole Big Cycle** taking place within the **central/Atomic Octavic Level** (3.7). Contrary to a continuous harmonic evolution, the **CHAOS** is present, **it is bound to happen** as a **concomitant of the evolution** on every cosmic level,

being the **motor of the evolution** [13,14]. In conformity with the **Fig. 0.** of [13], [12] and (3.7), the two basic **KAM** (Kolmogorov-Arnold-Moser) **curves** described by the **winding numbers/rhythm** of the evolution, evolving double-spiral-like on the KAM surface/invariant tori, are antisymmetric around the value +1, with maximal values of +5.236..., respectively -3.236..., which represent the chaotic peaks of the evolutionary cycle, both preceded by swings/spins with values of -0.309..., respectively +2.309..., realizing in this way a whirlpool-like shift/spring/jumping between the two „**edges of Chaos**”, respectively (**not eternal!**) **INFLATIONS**, with maximal values on the **Atomic Level** and symmetric decreasing in both directions of the other cosmic levels (3.7). The **CHAOS** is fed by the **LIGHT**, and the **LIGHT** is fed by the **DARKNESS**, of which energy feeds the **BION**, the **LIFE-PARTICLE** [5,9,11,20] (3.1,3.7,3.8). The **quintonic** nature of the BION is a result of its formation through the 5 dark phases (dark keys on the piano) of the Big Cosmic Vortex (3.7,3.8). The **LIGHT** – contrary to the appearance – is not uniform. It is graduated according to **light-dimensions LD** (3.7) from **-3LD** to **+3LD** in the **Bionic phase**, respectively from **+3LD** to **+89LD** in the **Nucleonic phase**. The transition between the 7 notes/levels (white keys on the piano) of the **Nucleonic phase** is realized through the respective **ETHERONS** created by the suitable **implosions**, starting with the **Big Implosion** at the Big Cosmic Cycle, which creates the 3LD Tachionic Etheron, the following **small implosions** creating in order the 5LD Noethic Etheron, the 8LD Etheric/IOVITZU’S Etheron – [24], the 13LD Atomic Etheron/ELECTRON, the 21LD Astral Etheron/GALAXY, the 34LD Universal Etheron, the 55LD Multiversal Etheron, ending with the 89LD Big Explosion (3.7). In conformity with the ideas promoted in [7,8,10,12], the **implosion of the Horn-Toryx** – as end-point of the **Ginzburg/helical-toroidal/bionic evolutionary phase**, which starts with the **Helyx**-phase after the Big Explosion and continues with the 5 **Ring-Toryxes**, all with their belonging spherical coatings/LeSage-like bubble-cages [26] – in form of **conic-toroidal core** constitutes the (**dual**, not topological!) transformation mechanism from the **bionic** to the **nucleonic matter structuring** within the **Matter-Energy-Information** three-interactional system, including the **3 basic cosmic fields** represented by the conics **Hyperbola** (thermo-gravific field, with gravific monopole), **Parabola** (electro-magnetic field, with magnetic monopole), **Ellipse** (ethero-quark-gluonic field, with quark-gluonic dipole), and the belonging orthogonal **Dandelin–spheres** (tangent to the focuses of these conics) as complementary cosmic fields. In this context, inside this cosmic field-system, the **mass** will be created from the **mass-less „pre-elements” photon, etheron, bion and graviton**, through unification of the planar and spherical field-components, through their monopoles/ dipole, the **space** being the **interior**, the **time** the **exterior**, respectively the **spacetime** the **surface of the conic**, on which are created the elements as knots of the **Matter-Energy-Information fields**, thus quaternionic unities. After the implosion into a (not mathematical!) singularity, in conformity with the sketched mass-formation mechanism, inside the forming **Spindle-Toryx** creates a massive expanding spherical core, within the **Einstein/spherical/ nucleonic evolutionary phase**, ending with the **Multiversal Explosion** into a hyperplane and –sphere. The **mathematical description** of this **DynamicDual (DD) Evolving Big Cosmic Cycle** is possible with a **logistical-hyperbolastical evolutionary equation** [18,27], but with hundreds of parameters as **dualities of a hierarchical dualities’ system** [12]. The modelling in higher dimensions [21] will be more difficult, but it makes possible a more exact description of the so controversial question of the cosmic evolution, taking into consideration the higher energy-forms (energy-dynergy-trinergy [4,16,23]) and the intercalation of the chaotic phases [13], which are really the motors of the evolution, fed by the so called „**dark**” **energy-forms** of the bionic evolutionary phases intercalated between the nucleonic ones.

Conclusions:

Properly speaking, the provisioned reorganizing of the (not quite the classical geographical) continent of Europe, based on five **STATES UNIONS** formed by national states – **countries** – composed by regions – **counties** – and en-/ex-claves, with dynamical **self-organizing functioning** – instead of the actual statical uni-central domination – is a viable **alternative** opposite to the actual **European Union** and the proposed foolish **United States of Europe**.

Independently of the fulfilment of my vision referring to the hitting of Sedna against Sedona, it is a stringent necessity to reorganize the terrestrial organism, with participation of all actual terrestrial inhabitant humans, based on self-governing principles, instead of self-destruction, for saving our planetary home and our fragile civilization against the hostile cosmic intruders.

Exceeding the exclusiveness of the secular cosmic theories, and taking into consideration the new scientific discoveries, cosmic model attempts, respectively reconsidering some old theories, results a new world concept and view of life, which finally is similar to a **diatonic musical system** composed by **pentatonic** and **octavic** scales, on which the **Almighty** plays the **Grand Cosmic Piano**, within an **Infinite Divine Concert**.

SUCCESSIVE FRACTALITY OF THE COSMIC OCTAVIC NOTES

(3.4)

IMAGINARY SECTION OF THE CONIC-TOROIDAL STRUCTURE - (3.5)

THE ELEMENTS OF THE CONE – THE CONICS AND BELONGING DANDELIN-SPHERES – DELIMITED BY A CENTRAL HORN-TORUS AND BIFURCATED UP AND DOWN SECONDARY SPINDLE-TORI, MODEL THE BASIC COSMIC FIELDS:

- **HYPERBOLA** – THERMO-GRAVIFIC FIELD, with gravific monopoles;
- **PARABOLA** – ELECTRO-MAGNETIC FIELD, with magnetic monopole;
- **ELLIPSE** – ETHERO-QUARK-GLUONIC FIELD, with quark-gluonic dipole

THE INTERIOR OF THE CONE REPRESENTS THE SPACE-DOMAIN, AND THE INTERIOR OF THE TORI THE TIME-DOMAIN, RESPECTIVELY THE CONIC SURFACE THE SPACE-TIME, ON/IN WHICH ARE HAPPENING THE EVENTS. THE DIMENSIONS ARE COORDINATES OF THIS SPACE-TIME STRUCTURE, IN CONNECTION WITH THE INVOLUTION-LINE LIGHT (13D) – INFORMATION (8D) – ENERGY (5D) – MATTER (3D), IN FRACTAL STEPS, WITH GENESIS FROM THE MICRO- COSMIC, AND DISTRIBUTION ON THE MACRO-COSMIC LEVEL.
